Ethiopian Association of Civil Engineers (EACE) Editorial Policies

1. EACE follows the double blind peer-review procedure for submissions of all manuscripts to its journal.
2. All submitted articles are subject to an extensive peer review, in consultation with members of the journal's Editorial Board and independent external referees. All manuscripts are assessed rapidly and the decision taken by the journal's Editor-in-Chief (EIC) based on all the peer reviewers' comments conveyed to the author(s).
3. All efforts will be made to expedite the peer review process leading to timely publication.
4. Authors publishing with EACE retain the copyright to their work. Submission of a manuscript to the respective journals implies that all authors have read and agreed to the content of the Covering Letter or the Terms and Conditions. It is a condition of publication that manuscripts submitted to a journal have not been published and will not be simultaneously submitted or published elsewhere. They will also have the right to:
    i. Reproduce the article, to incorporate the article into one or more collective works, and to reproduce the article as incorporated in collective works;
    ii. Create and reproduce Derivative Works for educational purposes. iii. Distribute Copies
5. EACE journal will be published biannually but manuscripts will be accepted and reviewed throughout the year.
6. **Appeals and Complaints:** Generally, the editorial decisions are not reverted. However, authors who think that their manuscript was rejected due to a misunderstanding or mistake may seek an explanation for the decision. Appeals must give sound reasoning and compelling evidence against the criticism raised in the rejection letter. A difference of opinion as to the interest, novelty, or suitability of the manuscript for the journal will not be considered as an appeal. The EIC and other relevant editors will consider the appeal and the decision thereafter taken by the journal will be deemed final. Acceptance of the manuscript is not guaranteed even if the journal agrees to reconsider the manuscript, and the reconsideration process may involve previous or new reviewers or editors and substantive revision. Authors who wish to make a complaint should refer them to the Editor-in-Chief at eaceresearch@gmail.com
7. **Plagiarism Prevention:** EACE checks instances of overlapping and similar text in submitted manuscripts. Contents of the manuscript will be checked against a database of periodicals, the Internet, and a comprehensive article database. It generates a similarity report, highlighting the percentage overlap between the uploaded article and the published material. Any instance of content overlap is further scrutinized for suspected plagiarism according to the publisher's Editorial Policies. If the similarity seems legitimate, the article will be proceeded for further review process; however, in cases of superfluous plagiarism, the authors have to revise the text as per editorial instructions.

    Low Text Similarity: The text of every submitted manuscript is checked by using Content Tracking method. The Content Tracking mode ensures that manuscripts with an overall low percentage similarity (but which may have a higher similarity from a single source) are not overlooked. If the similarity level is

significantly high, then the manuscript is returned to the author for paraphrasing the text and citing the original source of the copied material.

It is important to mention that the text taken from different sources with an overall low similarity percentage will be considered as a plagiarized content if the majority of the article is a combination of copied material.

High Text Similarity: There may be some manuscripts with an overall low similarity percentage, but a higher percentage from a single source. For instance, a manuscript may have less than 20% overall similarity but there may be 15 % similar text taken from a single article; the similarity index in such cases is higher than the approved limit for a single source. Authors are advised to thoroughly rephrase the similar text and properly cite the original source to avoid plagiarism and copyright violation.

Types of Plagiarism: We all know that scholarly manuscripts are written after a thorough review of previously published articles. It is therefore, not easy to draw a clear boundary between legitimate representation and plagiarism. However, the following important features can assist in identifying different kinds of plagiarized content. These are:

- Reproduction of others words, sentences, ideas or findings as one's own without proper acknowledgement.
- Text recycling, also known as self-plagiarism. It is an author's use of a previous publication in another paper without proper citation and acknowledgment of the original source.
- Paraphrasing poorly: Copying complete paragraphs and modifying a few words without changing the structure of original sentences or changing the sentence structure but not the words.
- Verbatim copying of text without putting quotation marks and not acknowledging the work of the original author.
- Properly citing a work but poorly paraphrasing the original text is considered as unintentional plagiarism. Similarly, manuscripts with language somewhere between paraphrasing and quoting are not acceptable. Authors should either paraphrase properly or quote and in both cases, cite the original source.
- Higher similarity in the abstract, introduction, materials and methods, and discussion and conclusion sections indicates that the manuscript may contain plagiarized text. Authors can easily explain these parts of the manuscript in many ways. However, technical terms and sometimes standard procedures cannot be rephrased; therefore Editors must review these sections carefully before making a decision.

Plagiarism in Published Manuscripts: Published manuscripts which are found to contain plagiarized text are retracted from the journal website after careful investigation and approval by the Editor-in-Chief of the

journal. A 'Retraction Note' as well as a link to the original article is published on the electronic version of the plagiarized manuscript and an addendum with retraction notification in the journal concerned.

9. Authors can self-archive post prints of their published articles.
10. Authors can reproduce derivative works of the article for educational purposes and distribute its copies.
11. **Publication Charges Policy:** All publications **on** EACE are processed without any publication processing fee from author/s
12. **Corrections in Published Articles:** Authors and readers are encouraged to notify the Editor-in-Chief if they discover errors in published content, authors' names and affiliations or if they have reasons for concern over the legitimacy of a publication. In such cases, EACE will publish an ERATUM or a CORRIGENDUM, in consultation with the Editor-in-Chief and authors of the article, and/or replace or retract the article.
13. **Article Withdrawal:** Articles in Press (articles that have been accepted for publication or published as Epub Ahead of Schedule but which have not been formally published with volume/issue/page information) that include errors, or are determined to violate the publishing ethics guidelines such as multiple submission, fake claims of authorship, plagiarism, fraudulent use of data or the like, may be "Withdrawn" from the journal. Withdrawal means that the article files are removed and replaced with a PDF stating that the article has been withdrawn from the journal in accordance with EACE Editorial Policies.
14. **Article Retraction:** If any manuscripts are published, having certain assigned information of volume / issue / page number, and it is found that there are infringements of professional ethical codes in their content, such as plagiarism, excess similarity with some other article, fraudulent use of data, etc., then such manuscripts are retracted.
15. **Concurrent publication/Simultaneous submission:** It is a condition of publication that manuscripts submitted to the EACE journal have not been published and will not be simultaneously submitted or published elsewhere. Plagiarism is strictly forbidden, and by submitting the article for publication the authors agree that the publishers have the legal right to take appropriate action against the authors, if plagiarism or fabricated information is discovered.

    Authors who wish to publish translations of the articles that have been published elsewhere should ensure that they have appropriate permission(s), indicate clearly that the material has been translated and republished, and indicate clearly the original source of the material. The Editor-in-Chief may request copies of related publications if he/she is concerned about overlap and possible redundancy.
16. **Disclaimer:** Responsibility for the content published in EACE journal, including any opinions expressed therein, rests exclusively with the author(s) of such content. To the maximum extent permitted by applicable law, EACE (on its own behalf, and on behalf of its staff and members of its editorial and Publication Committee) disclaims responsibility for any and all injury and/or damage (whether financial or otherwise) to persons or property, resulting directly or indirectly from any ideas, methods, instructions or

products (including errors in the same) referred to in the content of EACE journal. Any dispute arising, including any claim, shall be governed exclusively by the laws of the Federal Republic of Ethiopia.
